University of Split, Croatia

---

## Projects

- Minimalistic portfolio (developed with HTML, CSS and JS).  
Hosted on Github Pages: [Portfolio \(live demo\)](#)  
Code: [Portfolio \(code\)](#)
- Started to work on my own full-stack application that will serve as a dynamic blog, focusing on the realms of art, food recipes and Asian culture while learning and applying web development skills.  
For front-end part, I used HTML, CSS and JS. Back-end has only basic functionality, developed with Node.js (using Express framework and SQLite).  
Front-end part is hosted here: [Blog \(live demo\)](#)  
Code is here: [Blog \(code\)](#)
